PROFILE

Passionate about learning and growing, with a focus on solving real-world challenges through technology.

EXPERIENCE

Mobile Application Developer Intern

MAY 2025

Aalan TechSoft, Salem

Worked on developing a secure password manager mobile app using Flutter and Dart. Implemented biometric authentication with the local_auth package, used SharedPreferences for offline storage, and integrated local notifications using flutter_local_notifications. Gained hands-on experience in UI design, widget handling, and real-world app functionality.

Technologies Used: Flutter, Dart, Visual Studio Code

PROJECTS

Mobile App for Crop Prediction and Farmer support

Built a machine learning-based mobile app using Flutter and Dart to predict crop yield using live weather and location data. Integrated the OpenWeatherMap API and GPS for real-time updates, which helps farmers make better sowing decisions.

Technologies Used: Flutter, Dart, ML, OpenWeathermap API, GPS

Employee Management and Attendance Tracker

Created a database to manage employee and attendance details. Added triggers to update check-in/out time automatically and functions to calculate total working hours. Generated reports for monthly attendance and late arrivals.

Technologies Used: SQL, MySQL Workbench
